

DESCRIPTION

The 7198 is a kit that contains a wide range of fittings, adaptors, connectors and hoses to allow connection to pressure instruments and CalBench modules. The range of thread types and sizes allow virtually all pressure devices under test to be connected rapidly.

The kit includes adaptors for metric, BSP parallel and taper threads, as well as NPT each with a male and female counter part. Coupling connectors included allow any two adaptors to be connected together. Connection to different hose types is provided by 1/4 BSP G hose fittings for pushfit 4mm, 6mm external diameter hose, quick release couplings as well as barbed 6 and 8mm internal diameter hose. A nylon hose set with quick release connectors is provided for low pressure connections as well as parts to build up custom lengths. High pressure connections are made with Minimes 1620 test point adaptors and included minimes micro bore hose.

The 7198 is an extremely useful and practical kit, suitable for laboratories and test facilities in process plants. It is the recommended pressure accessories kit for Time Electronics CalBench systems that feature pressure modules or pumps.
