

## Description

The 7080-HD15 is a compact, heavy duty version of the CalBench system that is 1500 mm wide. The bench incorporates a framework with robust steel endframes and cross braces to provide maximum reinforcement. The worktop is 1500 mm wide x 800 mm deep with 40 mm thick durable laminate finish with shock-proof edging (other tops available upon request). The frame consists of two top cross members and a single base cross member that is situated across the lower rear section of the bench.

All standard under worktop fittings are available, these include drawer and cabinet units, and PC/dry block calibrator holders. The standard CalBench arms and a 1500 mm wide console are fitted to the heavy duty frame, with a perforated panel supplied (unless 7081-15 secondary console is ordered). This type of CalBench is suitable for smaller work spaces requiring a compact solution with excellent workload coverage.

## Features

- Compact version of CalBench (1500 mm wide)
- Heavy duty style, reinforced, steel section framework
- Heavy load bearing (up to 800 kg U.D.L. capacity)
- Bench frame finished with RAL 7035 light grey
- Durable light grey laminate worktop with shock-proof edging
- Console height can be set at 1568 mm or 1413 mm
