

DESCRIPTION

A heavy duty worktop vice that comes with turntable. It is made from cast iron for strength and durability. The base bolts directly to the work bench surface for stability, and swivels and locks for versatility. Roll-formed screw threads ensure smooth operation and durability. Chrome-plated hardware resists corrosion. Three standard jaw widths are available; 100, 125, and 150mm. The turntable rotary system allows you to position the work piece and use the safest work position rather than compromise and work around the fixed direction of the vice.

FEATURES

- Cast iron construction for strength and durability
- Base bolts directly to work bench surface for stability
- Base swivels and locks for versatility
- Roll-formed screw threads ensure smooth operation and durability
- Chrome-plated to resist corrosion
