

Description

The 7192 is a hand operated benchtop pneumatic pump that generates 95 % vacuum or up to 25 bar (375 psi) pressure. Compact and easy to use, it provides a highly stable dual pressure source ideal for reference calibration with accompanying precision gauge. A high-quality screw press is designed for fine pressure adjustment, with adjusting resolution up to 0.1 mbar (10 Pa). A specially designed shut-off valve makes the pressure stability as high as possible during calibration. A built-in gas-liquid isolator protects the pump from moisture and dirt to minimize the maintenance. Two finger-tight connectors installed on the pump allow the user using fingers to connect and disconnect the reference gauge and devices under test quickly and easily without the need for PTFE tape or wrenches.

The 7192 is ideal for applications requiring mid range pressure testing and calibration. It can be used in calibrating gauges, transmitters, or other pressure measuring instruments. To accompany the pump Time Electronics offer a range of digital pressure gauges, including the TEG-CV25b/0.2, vacuum to 25 bar gauge with 0.2 % full scale accuracy.

Specifications

Media	Air	
Generated Pressure Range0.95 bar vacuum to 25 bar press (14 psi vacuum to 375 psi press		
Pressure Resolution	0.1 mbar / 10 Pa	
Material	Ram/adapters: SST; Body: SST/aluminum; Seals: Buna-N (nitrile)	
Connection	Finger-tight connectors for both test gauge and reference gauge	
Pressure connections		
Height		
Base		
Weight		
Options	Digital gauges, carry case (7192-CC), maintenance kit (7192-MK).	

Features

- 0.95 bar vacuum to 25 bar (375 psi) pressure
- Double output manifold
- High pressure resolution (0.1 mbar)
- · Precision screw press for fine adjustment
- Smooth pressure generation
- Pneumatic
- Compact design ideal for field or lab use
- Suitable for use with calibrators and gauges
