

Description

A framework kit that connects to the CalBench frame to bring a light rail up and over the console to provide additional lighting to the workspace. A convenient addition to the system, ideal for customers that want to maximise visibility to the applications performed on the CalBench.

As standard each CalBench features an LED panel situated under the primary console that provides worktop illumination. The OHL-2000 is an addition to this.

Ordering Information

OHL-2000Overhead Light Kit for CalBench

Features/Specifications

- Heavy duty rear frame mounting kit with overhead light for CalBench
