

## Description

The TL09 is a mobile work bench that connects to the Time Electronics CalBench system. It is a heavy duty solution with base shelf for storage and positioning of instruments such as dry block calibrators, pumps, test stands and equipment that are commonly used with the CalBench. These items can be quickly utilised on the worktop when required.

The mobile bench acts as an ergonomic extension to the CalBench work area, providing both additional storage and worktop space. When connected to a 7080-HD CalBench the overall table width is increased to 2750 mm.

The TL09 worktop is the same type as the CalBench, with durable grey laminate and shock proof edging. Optional worktops are available, including a stainless steel version. For mobility the unit features industrial grade castor wheels for use in workshop and laboratory environments.

The TL09 has an under worktop clamp mechanism for connection to the CalBench. This fixing enables the unit to be set up for permanent installation if required.

When purchased as part of a turnkey calibration lab or workshop, the TL09 is supplied as per to the design for intended use. It is a practical solution to aid users with testing applications, repairs and service work.

## Features/Specifications

- Dimensions: W 750 x D 800 x H 855 mm
- Supplied to match accompanying CalBench worktop height (855 mm)
- Durable grey laminate worktop with shock proof edging (as per accompanying CalBench)
- Reinforced, steel section framework
- Castor wheels for mobility around workshop if required
- Clamping mechanism for securing to CalBench
- Frame work finished with RAL 7035 light grey (matches CalBench)
- Base shelf for instrument storage such as dry block calibrators, pressure pumps, and more
- Various worktop options available
