

Description

A premium quality aluminium monitor mounting arm that can be used on CalBenches and in workshops and laboratories. It offers a solution to ergonomic positioning of monitors and displays, with adjustment to move the unit away from the workspace when not in use.

The unit is an ideal solution for EasyCal software users that want to extend or duplicate the CalBench control centre onto a larger display. This makes it particularly useful for training on the bench. The arm is also beneficial for standing users as it enables the monitor to be raised up and by the console.

Details/Specifications

- Suitable for use with 20" or 22" monitors (optimal size for under console)
- Supports loads up to 10 kg (max monitor size of 34")
- Sturdy aluminum construction, finished in white (other colours available)
- Mounting: VESA FDMI MIS-D (Hole pattern: 100 x 100 mm & 75 x 75 mm)
- 640 mm maximum range (25")
- Tilt Range: 70° backward, 15° forward
- Overall side-to-side panning motion is 360°
- 3 turning points: base/extension (180°), extension/arm (360°), arm/pivot (180°)
- Mounts directly to the perfo panel
- Cable covers to safely route cables and cords
- Fitting: Fits to the 4 holes on the lower section of the perforated panel
- Options: Mini PC holder available, other mount accessories upon request

Key Features

Flexible and adaptable

Accommodates different monitor sizes and configurations with various attachment options and accessory kits.

CalBench ergonomics

Customizable positioning of the monitor when working at the CalBench. With increased tilt range and easy positioning to suit both seated and standing users.

Modern solution

The arm features a sleek design with integrated cable management that helps maintain a clean and tidy CalBench workspace.

Maximize workspace

The arm folds back over the base into a compact retracted position, meaning the monitor can be position flat to the perforated panel, or away to the side of the CalBench.

Integrated rotation-stop

A built-in stop mechanism can be engaged to limit the extension's side-to-side motion. This helps prevent damage to the perfo panel or to the monitor when perfo options are fitted.

Ordering information

- TL101Perfo Panel Mounted Monitor Arm for CalBench
- TL105Mini PC Mount (attaches to VESA mount or perfo panel)
- 7123 Under bench PC holder (suitable for tower-style PCs)
