Multifunction Calibrators and Digital Multimeters

Precision Calibration Instruments for Wide Workload Coverage
5025E & 5025C
Multifunction Calibrators

- 0 to 1050V AC/DC voltage
- 0 to 22A AC/DC current
- 1Ω to 1GΩ resistance
- Thermocouple simulation
- Digital frequency
- Oscilloscope calibration
- PT100 simulation
- Capacitance and inductance
- Power calibration
- Clamp meter calibration
- GPIB / RS-232 / USB Interfaces

Multi Instrument Calibration
The 5025 series are high performance multi-product calibrators that provide the foundation for cost-effective calibration. Built for versatility and simplicity each model offers a solution to efficient calibration of a wide range of test and measurement equipment.

Each model features AC/DC voltage and current, digital frequency, decade and simulated resistance, capacitance, conductance, PT100 and thermocouple simulation. Options include power and oscilloscope calibration, and enhanced performance packs that provide full range variable resistance, extended capacitance, inductance and increased ACV frequency bandwidth. External adaptors are available for clamp meter calibration, optical tachometer calibration and more.

Simple Operation
Functions and ranges are easily accessed from the front panel. Increase and decrease keys per digit, are used to quickly set the output value. Deviation control then enables the user to finely adjust the output value as a percentage (+/-0.999%). All this information is shown on a clear, easy to read LED display.

Calibration Made Easy
Connect the 5025E or 5025C to a PC/Laptop installed with Time Electronics’ EasyCal software and automate the calibration process. Increase speed of calibration and consistency of results, produce calibration certificates and reports to industry quality standards.
## 5025E and 5025C Specifications

5051 Plus Multifunction Calibration System

- Integral Calibrator, Multimeter, and PC
- Source up to 1050V AC/DC voltage
- Source up to 22A AC/DC current
- Source up to 1GΩ resistance
- Thermocouple simulate and measure
- PT100 simulate and measure
- Source capacitance and inductance
- Oscilloscope calibration
- Clamp meter adaptor included
- EasyCal calibration software included

Calibrator / DMM / Touch Screen PC
The 5051 Plus Calibration System combines a high accuracy calibration source with a precision digital multimeter. Designed for a wide workload the 5051 calibrates both traditional and new test equipment quickly and accurately. The 5051 control software allows the operator to easily select the wide range of functions using mouse, keyboard, or touch screen.

Standard internal features include AC/DC voltage/current, resistance, frequency, thermocouple/PT100 simulation and measure, capacitance/inductance calibration, and oscilloscope calibration. Also supplied is a clamp meter adaptor for clamp calibration up to 1100A, and test lead set to provide the necessary connections for nearly all applications.

Compact System For The Calibration Process
The 5051 Plus is an inclusive package with features to cover and optimise the entire calibration process. By integrating the calibrator, multimeter and PC in one unit minimal bench space is used. This also makes the 5051 ideal for site work with carry case supplied as standard.

The internal PC is preloaded with the EasyCal software suite, enabling automatic calibration to increase speed and efficiency of work. In addition EasyCal has features to manage and administrate both inventory and quality control. As a complete workstation the 5051 Plus is supplied with printer and connectivity kit for producing certificates and reports.

### Oscilloscope Calibration

- **Amplitude**: 6mV to 200V and 6mV to 2V 50Ω (Square-wave or DC) ± 0.05%
- **Frequency/Period**: 0.1Hz to 100MHz / 10ns to 10s (fixed values 1, 2, 5 sequence) ± 0.1ppm (0.1Hz to 10MHz / 100ns to 10s)
- **Duty Cycle**: 3 frequencies: 100Hz, 1kHz, 10kHz, settable from 0 to 100%
- **Fast-Rise**: < 400ps. Bandwidth checking up to 400MHz
- **Option 9769: Scope 2.2GHz Sweep** 100MHz to 2.2GHz levelled sine-wave (0.5, 1, 1.5V pk-pk) Amplitude ± 1%, Frequency ± 20ppm

### 6.5 Digit Multimeter (measure)

- **Voltage DC**: 0 to 1000V 35ppm of rdg + 6ppm of rng
- **Current DC**: 0 to 3A 500ppm of rdg + 50ppm of rng
- **Voltage AC**: 0 to 750V 0.06% of rdg + 0.04% of rng
- **Current AC**: 0 to 3A 0.1% of rdg + 0.04% of rng
- **Resistance**: 0 to 100MΩ 100ppm of rdg + 50ppm of rng
- **Frequency**: 3Hz to 300kHz 0.01% of rdg
- **Thermocouple**: -270 to 1800°C (Type J, K, R, T, S, B, E, N) ± 0.5°C
- **PT100**: -180 to 850°C ± 0.08°C

### PC Specifications/Details

- **Processor**: 64 bit, dual core (or equivalent)
- **RAM**: 4GB (or higher)
- **Hard Drive**: 60 GB Solid State (or higher)
- **Ports**: 4 x USB, 1 x Fast Ethernet
- **Display**: 10.4" Touch Screen LCD
- **Operating System**: Windows 8.1
- **Included Software Programs**: Calibrator and DMM control programs, EasyCal calibration software suite
- **Supplied Hardware/Accessories**: USB keyboard, Inkjet Printer, Cal and ID Label Printer, DVD-RW, 4 port USB hub, Numeric key pad, USB memory stick

### Options

- **Oscilloscope Calibration Options**: 9769: Internal Scope 2.2GHz Levellled Sine Generator • 9762: External Rubidium Frequency Reference • 9764: Current Probe Adaptor
- **External Adaptors/Instruments**: 9773: Optical Tacho Adaptor • 9790: 100 Amp AC Current Transformer • 9760: Power Amplifier (60V AC, 90V DC - 100mA) • TEG: Digital Pressure Gauges with RS-232 • 7085P: Temperature Distribution Unit • 7070/7071/7072: Dry Block Calibrators

### General Specifications

- **Supplied Items**: 5051PLUS Calibration System • Clamp Meter Adaptor • Premium Test lead set • Soft Carry Case • Printer and Connectivity Kit • Cal and ID Label Printer • 5051 Manual Control Software • Factory Calibration Certificate (NPL)
- **Warm up**: 30 minutes to full accuracy
- **Setting Time**: Less than 5 seconds
- **Temperature Performance**: Operating: 5 to 45°C. Calibration: 15 to 28°C. Storage: -10 to 50°C
- **Operating Humidity / Altitude**: < 80% non condensing. Altitude: 0 to 3km. Non operating: 3km to 12km
- **Line Power**: 100 to 260V AC 50/60Hz. 220W maximum
- **Dimensions / Weight**: W430mm, x202mm, c538mm. Weight: 23kg
ATE/Bench Calibrators and Digital Multimeters

Programmable Calibrators and Benchtop DMMs

5011 Resistance/Temperature Calibrator
A versatile, high accuracy calibrator that is primarily a programmable resistance/RTD source. Internal options such as DC voltage and thermocouple simulation, DC current, and 10MHz frequency can be added to increase capabilities.

- 1Ω to 120MΩ, 100ppm basic accuracy
- RTD simulation
- Optional thermocouple simulation
- 0 to 22V DC voltage option
- 0 to 220mA DC current option
- 10MHz frequency option
- RS-232, GPIB, and USB interfaces
- Front panel operation
- PC/laptop control via EasyCal software
- Rack mount kit option
- W451 x H152 x D272mm, weight 7kg

5018 Programmable DC-AC V-I Calibrator
A high precision calibration instrument that can be configured as a simple benchtop DC voltage calibrator or advanced AC/DC voltage and current source controlled via PC, performing any number of tasks as part of a complex ATE test rig.

- 15ppm accuracy, 0.5ppm resolution
- 1999999 full scale +10% over-range
- 20mV-200mV-2V-20V DC voltage
- Deviation control -9.999% to +9.999%
- Ramping feature
- RS-232, GPIB, and USB interfaces
- Ideal for ATE applications
- Front panel operation
- PC/laptop control via EasyCal software
- Rack mount kit option
- W451 x H152 x D272mm, weight 8.2kg

5045 Oscilloscope and Timer/Counter Calibrator
A high performance benchtop instrument for calibrating a wide range of oscilloscopes, frequency meters and timer counters. It provides outputs for amplitude, frequency, period, duty cycle, and bandwidth. Frequencies are generated from an internal 0.1ppm temperature controlled oscillator.

- 1mV to 220V square wave/DC
- Frequency 0.1Hz to 100MHz
- Time marker/period 10s to 10ns
- Fast rise <300ps
- Bandwidth check up to 600MHz
- Optional 2.2GHz levelled sweep
- Rubidium frequency reference option
- Front panel operation
- Virtual PC calibrator control software supplied as standard
- PC/laptop control via EasyCal software
- W451 x H152 x D272mm, weight 8.2kg
5077 Power Calibrator

A high accuracy power calibrator suitable for calibrating watt-meters, power meters, and kW-Hr meters. Supplied with “Virtual Front Panel” software the user can control the 5077 remotely via laptop or PC.

- Phase angle ± 90°, power factor 0.00 to 1.00
- 1mV to 1050V AC/DC
- 0.02 to 22A AC/DC
- 0 to 22kVA or 0 to 22kW
- 100A AC current transformer option
- 45 to 400Hz in 0.1Hz steps
- Clamp meter adaptor option
- RS-232, GPIB, and USB interfaces
- Virtual PC calibrator control software supplied as standard
- W210 x H89 x D415mm, weight 16.5kg

5065 Bench Digital Multimeter

A versatile 6½ digit bench multimeter with 19 measurement functions. Low cost, easy to use, stability, and high accuracy make the 5065 an ideal DMM for a variety of applications. With a comprehensive range of features the 5065 is suitable for test engineers, R&D, service, and calibration technicians.

- 6½ digit resolution
- Accuracy 0.005% DC voltage
- RS-232 and USB interfaces
- Optional GPIB interface
- Temperature measurements
- SCPI command set
- High sample rate
- 10 channel scanner card option
- PC/laptop control via EasyCal software
- W210 x H85 x D350mm, weight 4.4kg

5075 Precision Digital Multimeter

A benchtop digital multimeter that combines high performance with simple operation. The 5075 easily measures from nanovolts to 10kV, from picoamps to 30 amps, from micro-ohms up to 1GΩ, from picofarads to 300μF, with up to 7½ digit accuracy.

- 7 digit resolution
- Accuracy 0.005% DC voltage
- RS-232 and USB interfaces
- Optional GPIB interface
- Temperature measurements
- 18ppm accuracy/best 1 year
- 10 channel low thermal emf scanner option
- PC/laptop control via EasyCal software
- GPIB interface (USB adaptor available)
- Rack mount kit option
- W423 x H89 x D415mm, weight 8.5kg
Manage, Automate and Optimise the Calibration Process

About EasyCal

EasyCal is a complete software package with features covering all aspects of calibration work and management. It is designed to reduce workload, improve efficiency, and provide the essential platform for companies looking to create and sustain an effective calibration program. The comprehensive features simplify the administration process from reminder reports through to despatch. With a familiar and intuitive user interface all operators can quickly learn and navigate through the applications. This allows fast, straightforward implementation and integration of the software.

Communication and Control

EasyCal automates calibration runs by allowing the user to remotely control and communicate with compatible calibrators and DMMs. User friendly features and controls aid the process to further decrease calibration times. EasyCal can also read back values and data from compatible Time Electronics pressure and process instruments, and can be used with external instruments such as dry block calibrators.

For Multiple Industries and Disciplines

EasyCal is a versatile solution to multi-device calibration with the comprehensive functionality that is required across industries. It is globally used as the principal software in both calibration businesses and companies with on-site test facilities.

EasyCal is also designed for universal testing applications and can cover a wide range of disciplines. Users can calibrate and verify various instruments and devices: electrical and electronic; level, pressure, and flow; temperature and loop; mechanical and dimensional.

Features

- Communicate with calibrators, DMMs, bench modules
- Automated planning and scheduling
- For use with multiple devices and instruments
- Print/email/store certificates and reports
- Network compatible
- Produce calibration labels
- Quickly generate procedures using templates
- 1200+ pre-written test procedures included
- Calibration due reminder system
- E-mail reminder letters and lists
- Customise reports and certificates
- Create PDF reports and certificates (PDF engine)
- Print and read bar codes
- Universal instrument control
- HART and Foundation Fieldbus communication
- Secure user log in and electronic signatures
- Create uncertainty tables for laboratory & site
- WebCert feature for online certificates
EasyCal: For the Calibration Process

Automating the calibration process brings important benefits and provides increased speed of calibration and consistency of results.

**Pre-Calibration:** The calibration management features of EasyCal make the planning and organisation of instrumentation calibration simple. A recall/reminder system informs the user of upcoming jobs, and search functions allow the user to quickly identify a unit for test.

**Calibration:** EasyCal controlled calibration significantly decreases testing times, meaning less instrument downtime and faster turnaround. This improves throughput meaning greater return on investment. EasyCal optimises the process by allowing the user to create procedures quickly and easily with the help of the included design wizards and pre-written templates.

**Post Calibration:** Easily produce calibration certificates and reports to ISO 9001, ISO 17025, and other quality standards. These can be printed, stored, or emailed as PDFs. EasyCal has a selection of preformatted certificate templates suitable for displaying typical calibration results.

---

**The Core Benefits of using EasyCal**

---

**Achieve compliance with quality standards**
- Automated document control ensures conformity and quality
- Establish procedures to maintain repeatability and monitor quality
- Schedule and maintain calibration intervals.
- Evidence of traceability to national standards
- Record calibration environmental conditions
- Produce calibration labels, maintain calibration history
- Reduce possibilities for errors or omissions
- Electronic record retention ensures integrity for successful audits

**Create an efficient control and management system**
- Reduce testing times
- Eliminate continual outsourcing calibration costs
- Full control over the calibration process
- Improve turnaround
- Quick and easy solution to instrument analysis when needed
- Internal scheduling for calibrations. No external factors
- Centralised document management
- On demand networked review of certificates and reports
Inventory, Reminders, and Jobs

A comprehensive inventory database can be created and customised to company requirements. For internal calibration and quality management, departments and users can be specified. Alternatively EasyCal can be used as the controlling system for a calibration business based around customers and owners.

Search

A powerful search feature enables the user to enter specific criteria to quickly find the required data. When adding details the user is aided by drop-down lists, which automatically update when new information is added.

Input Fields

Used to add details such as ID and serial number, manufacturer and model, instrument status and service notes. In addition custom fields can be created to integrate with a company system. Images can be uploaded to provide further reference.

Instrument Recall and Reminder System

Instruments which are due for calibration are listed on screen. Reminder letters and lists can be printed or emailed directly to the customer or department. An advanced notice period can be set to bring forward the recall date allowing for response time.

Job Management

When a unit for test is booked in the job process starts. Specific information about the job is entered; such as ‘service required’, ‘sub contracted’ and ‘accessories supplied’. A job sheet and label can be produced at this stage to accompany the instrument. As the job is put through the system these parameters can be updated, for example ‘quote price’, ‘job status’ and ‘invoiced’.

Attachments

Create links to technical files, specifications, web pages, word documents, videos, and more. These can be set to automatically display prior to the calibration run.

Devices and Standards used for Calibration

Traceability information for instruments and standards that perform the calibration work is stored and maintained by EasyCal.

Uncertainties

Uncertainty tables for laboratory and site can be created for each calibrating instrument. These are then automatically processed and applied to certificates as required.
Procedure Writing and Editing

Creating and editing test procedures is made simple with an intuitive, user-friendly interface. Editing test information can be done by adding, inserting, or copy and pasting. EasyCal keeps track of each time a procedure is edited.

Procedure Library

A calibration library comprising of over 1200 procedures covering a wide variety of instruments and devices is included as standard.

Procedure Templates

Procedure templates for multimeters, clamp meters, decade boxes, insulation testers, and more can be used for creating any new procedures as required.

Fast Procedure Creation and Editing

Copy and paste multiple tests. Globally edit a group of tests. Colour coded listing helps sort and identify different test types.

Procedure Simulation

The Calibration Run Simulator enables a procedure to be tested without the need for a controlling instrument. To further assist with development of procedures a test can also be edited during the actual calibration run.

Format Certificates

Colour code and add borders to test group titles. Add column headers where a change of layout is required. A preview feature allows the user to check the certificate layout to determine if formatting is correct.

Conversion Tables

Conversion tables for thermocouples, RTDs, current transformers, and clamp meter adaptors are included. Alternatively user-defined tables can be created.

Remote Commands

For more complex instrument control, commands can be sent on a test-by-test basis or run as a script. Closed loop calibration is also achievable using the universal readback feature. This allows EasyCal to control third party calibration equipment and communicate with devices under test.
EasyCal Calibration Software

Overview of applications and features

11

Instrument and Device Calibration

Automated calibration run provides fast and accurate collection of data, whether using direct instrument control or manual entry. EasyCal guides the operator through the procedure using graphical test screens and user prompts.

Search

Selection of the device under test is quick and easy. With the use of a barcode scanner this selection becomes automatic.

Calibration Prompts

Text and graphical prompts aid the user with instrument range selection and connection. So even the most complex calibrations can be performed with relative ease.

Graphical Test Screen

The calibration run is made simple and efficient by a graphical user-interface, which increases speed of data entry. The colour coded indication bar displays the test limits. This allows the operator to easily identify out of tolerance results.

Test Control

At any stage during the calibration run a summary can be displayed, this includes both completed and remaining tests. Colour coding indicates tests passed or failed. The operator is able to move forward or backward through the procedure as required.

End of Calibration Run

Data for every test is stored, including a snap shot of the procedure used. If required calibration comments and service history can be updated. The operator is able to print the certificate, produce a calibration label and/or store the results to be issued as required.

Recovery Mode

If for any reason a calibration run is interrupted, recovery mode allows the user resume from the point of termination.

Calibration Test Forms

Alternatively ‘calibration test forms’ for hand written results are available. This data is then entered manually into EasyCal at a later date.
Certificates/Reports/Data Management

Produce, print, and store calibration certificates, reports, and labels. Simple search facilities enable the user to locate any data on demand. Keeping track of instrument history and servicing is made easy.

Certificate Templates
A range of pre-formatted templates are available for immediate use. A company logo can be added without the need for 3rd party software.

Electronic Signatures
Password protected electronic signatures allow management to approve certificates. In addition a scanned image of the signature can automatically be inserted, eliminating the need to print certificates.

Built-in PDF Engine
Generate PDF reports and certificates ready for emailing and universal review.

Calibration Reports
Documented traceability provides a recorded audit trail. Reports showing calibration duration times can assist with costing and assessments.

Archive
The results database can be streamlined by using the archive feature. This improves data organisation and management. Archives are quickly retrieved, giving instant access to historical certificate data.

Import and Export
Exchange data from one system to another using the import/export feature. This method is ideal for site and field calibration work, where data is recorded externally then uploaded to the main database upon return.

Customise
Crystal Reports (optional) allows full modification of certificate, label, and report layouts. Design custom reports using queries, formulas, and running totals.
**EasyAdmin**

EasyAdmin is an add-on that provides increased security for EasyCal and its users.

- **User Rights**: A master user sets the user rights for the relative staff and defines log in criteria.
- **Access Levels**: Setting access levels within EasyCal to limit secondary users can be done, safeguarding sensitive information.
- **Administration**: EasyAdmin provides an administration point for calibration instruments, certificate information and user fields.
- **Predefined Pick-Up Lists**: For instrument manufacturers, sub contractors, customer details and other information. These can be created to make EasyCal data entry quick, easy and uniformed.

**WebCerts**

WebCerts is a web based application that enables EasyCal users to upload and retrieve certificates and reports online.

- **Simple Upload/Download**: Uploading is incorporated into EasyCal by allowing the user to quickly and directly upload to their WebCert folders via FTP.
- **Secure User Log In**: A security feature that allows users to access private folders with their relevant documentation. Ideal for companies with different sites or locations.
- **Search and Filter**: Users can easily locate required data by using the filter tabs or the straightforward search fields.
- **Hosted Package**: Time Electronics also offer a hosted WebCerts package where data is uploaded and stored on one of our designated WebCert servers. Retrieval and viewing of certificates is via the web based interface.

**EasyCal Accessories**

To complement and further optimise the calibration process Time Electronics offer a range of external options.

- **Printer and Connectivity Kit**: Inkjet printer for calibration certificates and reports. Also includes a DVD-RW, 4 port USB hub, numeric key pad and USB memory stick.
- **Calibration and ID Label Printer**: For printing labels to be placed on calibrated units. EasyCal has different layouts for required information to be shown.
- **Job and Address Label Printer**: For printing information that accompanies a unit under test through the calibration process. Also for user tagging instruments.
- **Bar Code Reader**: Enables fast identification of devices in the pre-calibration stage.
- **EasyCal to PC Communication Options**: Interface cables and adaptors providing PC connectivity to Time Electronics calibrators or external instruments.
Networking with EasyCal

For multi-user systems EasyCal can be implemented as the universal software for administration, management, and control. With designated features for use in different workstations, EasyCal can provide a solution to calibration businesses with customers as well calibration departments within industrial plants.

Data can be shared and accessed on a central server, creating an organised and efficient networking set-up. EasyCal’s pre-calibration features enable automated scheduling and also speed up the booking in process with quick instrument identification.

Calibration runs can be automated by using a compatible Time Electronics calibrator with EasyCal. Once calibration has been performed the data can be made available on the server to the necessary parties. Hard copy certificates and reports can be issued by authorised staff.

Enhanced security features can be added for increased protection, allowing a master user to control access rights to data and applications. Also available is an online application enabling users to upload and retrieve certificates.

### EasyCal Licenses, Add-Ons, and Accessories

#### Primary Licenses

- **ECFL** EasyCal Full License (stand alone, when purchased individually)
- **ECFLA** EasyCal Full License (when purchased with compatible calibrator/DMM)

#### Extra User Licenses

- **ECFL** EasyCal Additional Full License (secondary user)
- **EC2WL** EasyCal Work Station License (full management/scheduling, no calibration run)

#### EasyCal Add-Ons

- **EAD2** EasyAdmin - 2 Users: Security add-on that enables setting of user rights and access levels. For installations of 2 users or less.
- **EAD5** EasyAdmin - 5 Users: Security add-on that enables setting of user rights and access levels. For installations of 5 users or less.
- **EAD10** EasyAdmin - 10 Users: Security add-on that enables setting of user rights and access levels. For installations of 10 users or less.
- **EAD10+** Additional users of EasyAdmin beyond 10 users
- **EWC** WebCerts: Online application enabling upload and retrieval of certificates and reports
- **EWCTE** WebCerts - Hosted by Time Electronics: Online application enabling upload and retrieval of certificates and reports.
- **CREP** Crystal Reports Software: Edit and format certificate styles

#### EasyCal Accessories

- **9795** Printer and Connectivity Kit
- **9777** Bar Code Reader
- **9778** Cal and ID Label Printer
- **9779** Job and Address Label Printer
